## Business Model

### Approaches To Meet Our Client's Needs

#### Time & Material

What you'll get

With time and material model, entities can get access to the highly skilled developers across the world and have to pay for the time that resources have spent on the particular project.

- ✓ Dedicated desk
- ✓ Project manager support
- ✓ 8 hour usage of our team
- ✓ Latest tools

#### Fix Scope Model

What you'll get

Customers can rely on us and hand over the project. In this model, we discuss on demand functionalities as well as cost in advance before starting with the project.

#### Hire Team

What you'll get

Our clients can hire developers on hourly, part time, and full time basis as per the business preference. By opting for hiring developers' models, customers can shorten development cycles and save infrastructure cost.

## Gamination

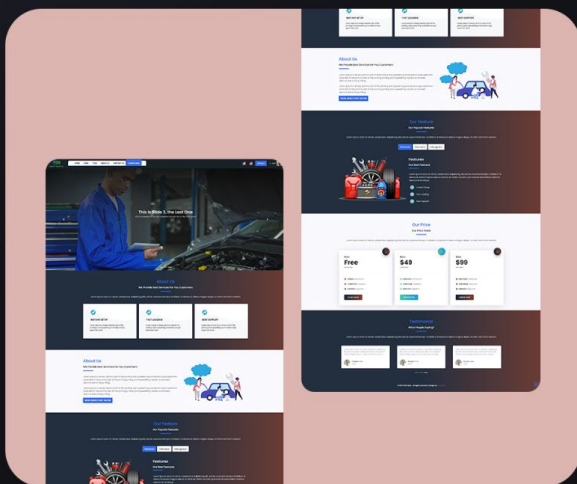

# Our Portfolio

## Web Development

### Paradise

An e-commerce platform for pets, enabling user registration via Google and Facebook to upload pet details. Guest users can browse and comment on pets, while PayPal and Stripe serve as the payment gateways.

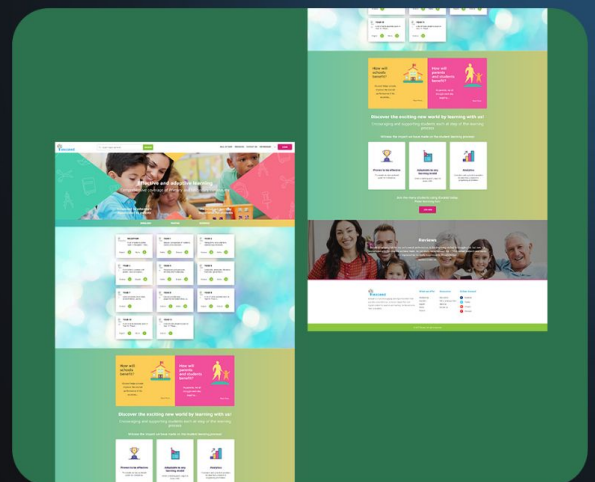

### PartGator

Developed with Laravel, Nodejs, Hollander Interchange, and Chat Socket, the project caters to vehicle part vendors. Vendors utilize the Hollander Interchange database to list and sell parts based on vehicle details, while customers can explore, chat with vendors, and make purchases through a front-end display.

### School Management System

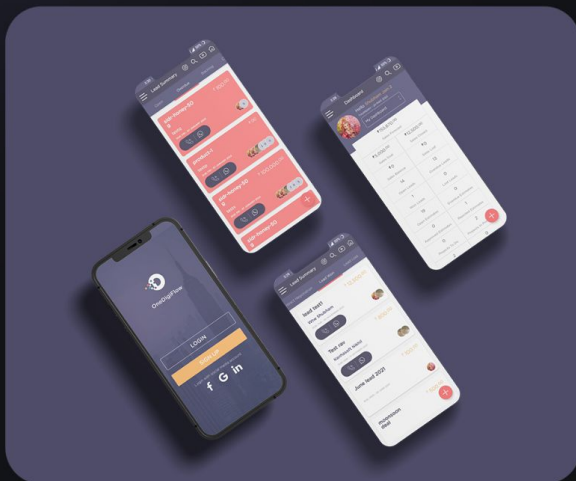

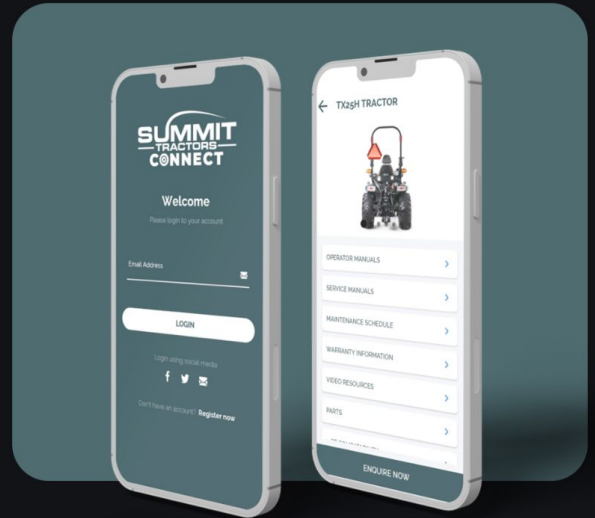

This advanced system is designed to efficiently oversee various school activities and responsibilities, catering to four distinct login sections: teachers, students, schools, and parents. The comprehensive end-to-end process commences with the registration of schools.

# Mobile Application

## Summit Tractors

Summit Tractors Connect, a mobile app for tractor enthusiasts, facilitates dealer location, maintenance guides, equipment registration, diagnostics, and one-click support, providing a comprehensive solution for equipment management based on user needs.

## OneDigiFlow

OneDigiFlow simplifies customer follow-ups, on-the-go quotations, project management, and automated invoicing. Boost productivity, analyze sales performance, and collaborate seamlessly with team members on the app.

## RFMx Wellness

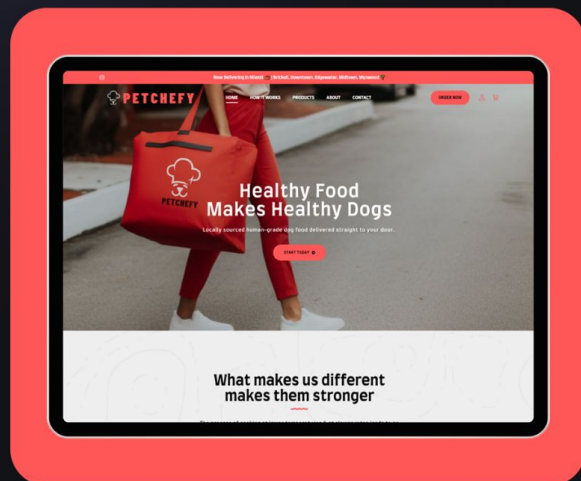

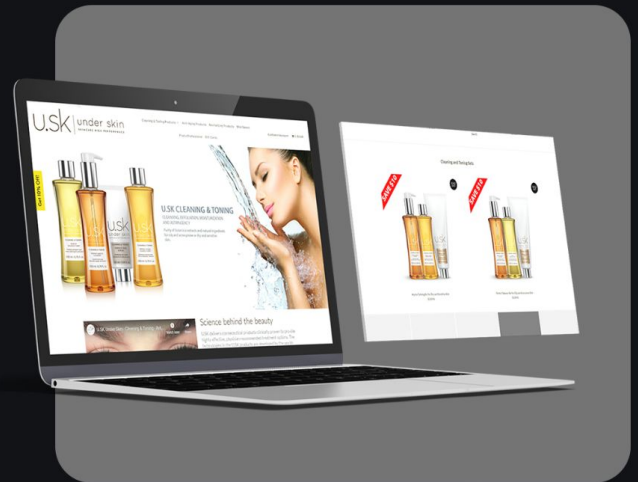

The RFMx Wellness app gathers data from Fitbit Tracker, Smart Scale, and Omron. Blood Pressure Cuff to stratify risk based on program data, enhancing health insights.

# Ecommerce

## Underskin

Configured the theme. Addressed the collection data issue, displaying only specific collection data, and resolved a checkout bug.

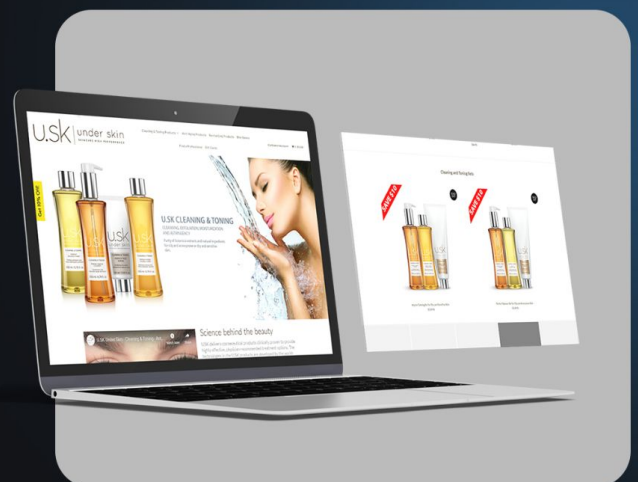

## Petchefy

Designed the customer dashboard interface. Implemented a new form to store data in our SQL file, displaying it on both the admin and user sides.

## Underskin (Sales):

Created sales report extensions tailored to individual salespersons. Implemented dynamic coupon code functionality during order creation.

# Gamination

## Crazy Balls

"Crazy Balls: Fruity Farming" is an immersive mobile game where players embark on a heartwarming journey through a vibrant forest, collecting bouncing fruits and tackling captivating challenges to cultivate a thriving orchard as a diligent farmer.

## Find it Fast

"Find It Fast" is a brain-challenging game that sharpens your mind by encouraging you to spot distinctions you might miss. With multiple modes and challenges, it provides a unique and fun spot-the-difference experience.

# UI/UX & 2D/3D Animation

## UI/UX & Graphics Design

Our graphic/UI/UX design services prioritize creative excellence, ensuring that your digital presence is visually compelling and user-centric.

Our UI/UX experts work collaboratively to create seamless and user-friendly designs.

## 2D/3D Animation

Elevate your brand with our expert 2D and 3D animations, bringing narratives to life through captivating visual story telling. We seamlessly blend creativity and technology to convey complex ideas engagingly.

Under his leadership, WAYTOWEB has grown from a 4-member team to over 30+ professionals. He believes in learning from practical experiences and encourages his team to embrace new technologies and the belief that nothing is impossible.

**Specialties:** End to End Sales, Technology Business Consultation, Client Relationships, Quality v/s Cost, Innovation, 24/7 Customer Support, In-time Quality Deliveries

# Words from Our Clients

”

On extremely short notice, WAYTOWEB came up with the perfect design I previously envisioned for my company. Thank you for the personal touch, understanding and responsiveness to all needs!

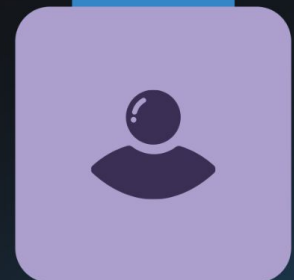

- Rumiana Gigova

”

Wow, just the template we were looking for! Stunning clean design, element rich, clean code, browser friendly and easy to manage.

Keep up the good work waytowebl!

- Eric Rogers

”

Awesome theme! Very intuitive to use, clean coded, and easy to customize. just rated 5 stars! Will recommend to all our partners and friend! Thanks a lot again!

- John Picket
